

«PeakTech® P 6210» Digital Power Supply with 4 voltage outputs

€259.00

Prices excl. VAT plus shipping costs and possibly lower value surcharge

Product number: P 6210

GTIN/EAN: 4250569402265

Description

The PeakTech 6210 is a laboratory power supply with 4 separate voltage outputs. Two outputs are infinitely variable using the rotary controls, which are attached to the sides of the front. The rotary regulators make it possible to set the voltage and current individually. The device also has the CC and CV function, which is used to set or display constant currents or voltages. The main switch of the laboratory power supply is integrated in the front, as well as the button for switching the output voltage on and off. There is also the option of using the two pushbuttons for switching to normal, serial and parallel, to set the type of interconnection of the mutually independent controllable outputs. Another special feature that this device brings with it are the two fixed voltage outputs. These outputs deliver a voltage of 5V DC and a current of 1A DC. Due to its versatility, the PeakTech 6210 can be optimally used in many areas of electrical engineering.

Technical features

- Dual channel Power Supply
- 14 mm 4-digit blue LED digital display
- 5 V/1 A fixed output
- Outputs can be switched off
- Overload and short circuit protection
- Internal heat sink and fan

PeakTech Prüf- und Messtechnik GmbH

Gerstenstieg 4

DE-22926 Ahrensburg

www.peaktech.de

- High load stability and low ripple
- Rugged metal housing with carrying handle
- Isolating Transformer: EN-61558
- Accessories: Power Cable and manual

Specifications

Auxillary output: 5 V DC

Channels: 2 CH

Cooling: Active

Display Type: Segment

Input voltage: 100 - 240 VAC 50/60 Hz

Output Current: 0 - 5 A

Output Voltage: 0 - 30 V DC

SELV:
